IV. Presentations
   • Brody Smith, Graduate Student and Student Advocate for Academic Affairs at Texas A&M University, gave a presentation concerning the proposed Texas A&M University academic calendar for next year. He and the other Academic Calendar Task Force members discussed how to change the academic calendar to include the Wednesday before Thanksgiving as a student holiday. Felt like this would help to allow students more time to travel home for holidays as there have been several deaths in recent years with students traveling home late at night on Wednesdays. They had 6 options for the university to consider and Brody mentioned three of these options: remove one of the Fall dead days, hold Academic Convocation on Saturday and Sunday, begin Fall classes 2 days earlier. Brody got input from the staff on how some of these options would impact staff. Staff noted that the timeframe for turning in grades could be impacted, getting in and out of dorms could be affected, as well as having to work on a weekend. Brody thanked the council for their input as it gave them more information to make a recommendation. Brody also said they would share with the council the results of the survey they had done.
   • Tom Swanner, Communications Chair for the University Staff Council, presented information on how the Keystone System works and about Filex. The Keystone System is an incident management system that keeps track of the emails sent to the Staff Council. The system numbers the record, records the information sent, and tracks the communication chain through the system. The program Filex is available as a secure place to put large files up to 2GB. Works like Dropbox but it only keeps the record for a short/limited time. This is the safest and recommended way by the university to transmit a document with confidential or
sensitive information. Only the intended addressee can view the file and the file cannot be forwarded by any other person. Anyone with a TAMU net ID has access to utilize this program and more information about FileX can be found at: https://filex.tamu.edu/.

IX. Reports from Special Committees, Working Groups, or Appointments.
1. Quality Enhancement Plan (QEP) (Lisa Blum) – September meeting was cancelled.
2. Council for Strategic Budgeting (CSB) (Linda Blum/Jenny Kenley) – Will meet Friday, October 18th.
3. Sub-Council, Strategic Reallocation (Faith Stringer) – Nothing to report. Has not been contacted yet.
4. Council on Climate & Diversity (CCD) (Lisa Blum) – Will meet on Tuesday, October 22nd.
5. **Faculty Workplace Climate & Diversity Committee** (Jennifer Le Grévellec)
Committee is working on revisions to a university rule that is up for review regarding Faculty Teaching Workload Reporting (12.03.99.M1). Currently there is no mechanism for the actual faculty members to report their workload. This is done at the Dean/Department Head level with no review or input from faculty. Some research needs to be done regarding the addition of faculty reporting and whether this would cause unknown issues. There is also some inconsistency in reporting between library faculty and other faculty.

6. **Diversity Operations Committee (DOC)** (Carmen Espitia) – Will meet on Friday, October 25th.

7. **University Worklife Committee** (Janelle Ramirez) – Did not meet.

8. **Council on Built Environment (CBE)** (Tom Swanner and Amanda Mather) – Will be meeting on Oct. 16th.

   **Follow-up:** The Council for the Built Environment met at 1:00pm on Wednesday, October 16, 2013. Items up for approval were:
   - AgriLife requested approval for a telecommunications tower in a field at the far north of their holdings next to Finfeather road in Bryan. It was recommended for approval.
   - The folks in Atmospheric Sciences requested a sign signifying our status as "Storm Ready" to be placed near the Eller Building (the old O&M building). The Design review subcommittee recommended against this and it was not recommended for approval.
   - The Turbomachinery Lab requested a storage building be built. Since the design passed the review of the Design review subcommittee, it was recommended for approval.
   - The Council recommended for approval a District Plan for Athletic Facilities which would be an amendment to the Campus Master Plan. Future buildings would still need to be submitted to the CBE for approval.
   - The last item was related to parking garages. In July and August, the CBE recommended approval for two new parking garages, one near the Engineering Complex, the other on the north side near the dormitories. If the Engineering garage was initiated in 2016 and the north side garage was initiated in 2020, there would not be an increase in parking fees because of the payoff completion of other garages which would make funds available for the debt service for the new garages. Since then two new garages have been proposed, one near Kyle field to handle game day parking and one on the west campus near the proposed new dormitory. These new garages do not have funding available for the debt service right now, so building them would result in increased parking fees for everyone who parks at TAMU. A number of schemes were introduced related to fee increases and the Council voted to send two options to the President. One would involve a 10% increase in 2015, a 7.5% increase in 2016 and a 5% increase in 2017. This would allow all of the parking garages to be initiated by 2018. The other option would have a 5% increase for 2015, 2016, 2017 and 2018 and would have all of the garages initiated by 2019. One thing to note is that the Kyle field garage and the West Campus Dormitory garage would be initiated in 2016 in both of these plans. The other garages would be initiated later.

10. **Audio Visual Surveillance Technology Committee (AVST)** (Les Fiechtner) – Committee met once.
    - Request for camera in MSC pointing at aquarium. Committee sent this request back to the group. There is an issue about privacy
    - Request came in to put 16 cameras in a lab to take pictures of equipment and for safety purposes. Request sent back for more information.

This annual event promotes safety and provides emergency preparedness information for faculty, students, and staff.
Cynthia reported that the Special Situations Team continues to meet monthly and that the number of reports received through the TellSomebody.tamu.edu website continues to grow each year. The team is also exploring purchasing threat assessment software.

- Charley Clark reported that the Task Force on Campus Emergencies continues to do outreach activities regarding the Code Maroon system. The Code Maroon system will be featured in an upcoming article in the Tech Decisions magazine and the Fort Bend Aggie Moms’ Club has asked for a presentation on the Code Maroon system in April 2014.

14. Search Advisory Committee – Chief of Police (Les Fiechtner) – Met October 10th. Three 3 candidate came to campus to interview in October. Meet with administrators, staff and students. Committee made final recommendation to chair and anticipate will select new Police Chief later this week.

15. Administrative Assessment Advisory Committee (Lisa Blum) - Met this morning, October 15th.
   - Price Waterhouse deciphering administrative review supervisors took. Results should be available in 2-3 weeks and was told they would provide data. Customer service survey was also sent out. Only 17% of faculty and 20% staff responded. Most found survey confusing. They are going to extend the date for the customer service survey as subject line was also confusing. Hot spots appear to be IT, dining services, and Sponsored Research Services. Please encourage employees to take survey. Committee will meet again next month.

    Member roll called

III. Recognition of Visitors (Lisa Blum / Jennifer Le Grévellec)
     Kenny Kimball, Assistant Director of Transportation Services

IV. Presentations
   •  Kenny Kimball, Assistant Director of Transportation Services, reported to the council that a great deal of information concerning Transportation Services could be found on the Transportation Services website at [www.transport.tamu.edu](http://www.transport.tamu.edu). He encouraged members that if their constituents had questions to contact Transportation Services. Peter Lange, Executive Director often meets with students to discuss their concerns and he would be happy to meet with any staff or faculty member. The most common question they receive is “Why do I have to pay to park?” An auxiliary like Transportation Services is not funded by the state. The state prohibits using any state appropriations for parking at universities. This must generally be supported by user fees. To change this funding process would require a state legislative action. Parking is never free. Even when you go into a business you pay for the parking spaces through the price of the goods purchased. If the funding mechanism was changed it would likely impact the same pool of funds employees are paid from. Transportation Services is composed of several units: Parking, Fleet and Transit. Transportation Services does not have the authority to build garages or raise permit rates. Both must go through a chain of command which ends with the Board of Regents. The number of permits sold is relatively static over the years. There is a visible increase this fall of about 1,000 permits due to a growing student population. Parking enhances revenue with visitor parking to help cover operational expenses. Our long term plan was to build a garage in the engineering corridor now and one in 2019-2021 in the North Side Dorm area with no permit rate
increases. The department has now been asked to consider the impact of building a garage at Kyle Field and one on West Campus in support of the new 4,000 bed resident halls immediately. If 4,000 beds are added to West Campus, Parking will have to support this with a garage as there is not room for an estimated 2,500 resident vehicles which do not move and require overnight parking elsewhere on campus. The department does anticipate a significant increase in permits sold once Resident Life completes its building process and resident population grows significantly. Transportation Services always advocates for the permit holder and will recommend the option which has the least impact on them. The current recommendation from the CBE to build all four garages in a shorter time frame is in the president’s office. Transportation Services is waiting to hear what the University leadership instructs us to build to accommodate campus parking needs. We believe it is unlikely due to the financial risk that the university will construct four garages in close quarter. Even our original plan spread out the two recommended by Kimley-Horn and Associates, Inc. in their demand study. If we postpone the original two planned it would require only two separate 3% increases. If you consider that 12th man will likely be willing to pay higher game day rates and that the Kyle Garage will have a robust visitor parking component outside of game day, it will actually be the least impactful on rates of the structures being considered.

3. Sub-Council, Strategic Reallocation (Faith Stringer)
   • The Strategic Reallocation Sub-Council had its first meeting of the year on Friday, November 8th. We had all been sent in advance copies of requests for reallocation funding from 9 different divisions on campus. Requests totaled over $42 million, the majority (over $24 million) of which is for base funding. At the meeting, we discussed our general thoughts on priorities and the process for deciding which requests to recommend for funding.
   • Each member is now scoring the requests he or she considers to be the “top 5” and ranking their top 3. Here’s the official wording of our scoring/ranking criteria:
     • Our philosophy for determining funding recommendations prioritizes proposals that will have an impact both deep and wide. Deep impact means proposals that will significantly affect TAMU’s progress toward excellence. Those with wide impact will affect the greatest number of people across campus. Our primary concern is with academics, whether direct support for college initiatives or meaningful support for the central teaching, research, and service missions of TAMU.
     • SRSC met again yesterday and narrowed down the proposals to 5 that we’re still considering. We’re going to vote and rank our individual choices again, then make a final decision at our next meeting on December 3

      Recommendation will be sent to BOR for January meeting. CSB website (csb.tamu.edu) has detailed
      recommendations listed.

   3. Sub-Council, Strategic Reallocation (Faith Stringer)
      The Strategic Reallocation Sub-Council voted via email to rank our priorities among the top 4 funding
      proposals (IT, Libraries, Undergraduate Studies, and Provost), as well as recommending an amount of
      funding to provide to each. We had our final meeting for the year on December 3rd, where we
      discussed potential funding scenarios and how to handle smaller-budget items that we feel are still
      important. We voted a final time on the reallocation scenario and amount of funding.

      The recommendation (which will be sent to the Council for Strategic Budgeting today – yesterday, by
      the time the USC meeting happens) is to fund the top 3 priority proposals (IT, Libraries, and
      Undergraduate Studies) at the average amounts recommended by voters. In all three cases, we’re
recommending awarding most of what they requested. This is a total of about $3 million. We’re recommending a 0.4% reallocation from academic colleges and a 1% reallocation from all other units. IT, Libraries, and Undergraduate Studies would be exempt from the cut, since they’re the departments we’re trying to fund.

We are also recommending that the Council for Strategic Budgeting consider the two smaller-budget items that we feel are still important (funding for bus replacement 160K and for funding to pay fees for graduate assistants 150K) and requesting that they discuss the possibility of including auxiliary units in future reallocations.

Alma will not be replaced by a new member and only one representative from EVP & Provost will be replaced due to change in FTEs in that group. There will be 5 new members elected to serve 2014-2017. 3. Council on Climate & Diversity (CCD) (Lisa Blum)
   Met Feb. 12. Scored reports by college and other units. Drs. Stanley and Watson will meet with individual basis with colleges and units.

4. Faculty Workplace Climate & Diversity Committee (Jennifer Le Grévellec/Reneé Weidemann)
   1. Resolutions/Concerns regarding faculty and the HSC/TAMU merger
      The committee is currently seeking resolution with administration on:
      - Faculty tenure
      - 360 evaluations
      - HSC CEO reports directly to the president. All other faculty reporting structures go through Dr. Benedict/Dr. Watson then to the President. This reporting structure is a problem; however, they don’t feel it is a good time to address with a new interim president.
2. Faculty Workload Reporting Rule (12.03.99.M1) currently under review
The committee discussed revising the rule to:
- Increase transparency and reduce inequities on how workload is reported
- Include a real number, not a minimum number (currently the rule states: the minimum workload requirement for faculty members, paid 100%, is 9 teaching credits)
- And include language to require validation
  - There was a question and clarification requested for “teaching credits” and “teaching equivalents” for the professional schools (medical, law, vet med, dentistry, pharmacy)
  - The committee will review and propose adding professions for clarification and how CTC’s are calculated (CTC = Classroom Teaching Credit)

The committee is looking at either preparing a survey for faculty or reviewing the results from the last climate survey to determine the inequities across campus on how workloads are counted and reported.

5. Diversity Operations Committee (DOC) (Carmen Espitia)
Committee met on February 10th:
Lynn Barnes, Director of Recruitment gave an Admissions update.

Accessibility in the Built Environment
Janelle Ramirez, Interim Associate Vice President for Human Resources & Administrative Services and Lilia Gonzales, University Architect presented on Accessibility in the Built Environment and the Workplace Lactation Program.

Discussion centered on ADA Accessibility Guidelines; Texas Accessibility Standards and the Campus Accessibility Guide. A document, compiled by the Women’s Resource Center, with a list of all known lactation spaces open to the public was distributed. Several committee members stated that other lactation spaces exist, but are restricted to a particular college/unit. Dr. Stanley would like to compile a comprehensive list of all lactation spaces on campus, public and private and asked committee members to provide the information to her office by February 24th.

Rooms for lactation - locked location - administered by college or department. Accessible by public if ask for access. Specific regulations that room has to include. Can't be bathroom, access to warm water, access to refrigerator and private. Not required to have room - we are required if and when an individual needs to pump - work with supervisor - a room designated for them to do that. Any place locked and secured - not permanent room - temporary period of time while mom is doing this. Federal regulation standard administrative procedure which refers to the federal reg.
Reminder: On February 24th there will be a work session to discuss the results of recent faculty, staff, and student (graduate and undergraduate) campus climate assessments. This will be held from 9:30 a.m. to 12:30 p.m. at 301 Rudder Tower.

6. University Worklife Committee (Janelle Ramirez)
   Committee has been disbanded.

7. Council on Built Environment (CBE) (Tom Swanner and Amanda Mather)
   There were four presentations for new construction projects presented by the sub-councils. All four were recommended for approval.
   1. Hensel Park Telecommunications Building - The Telecommunications department needs to expand the Kyle Field Distributed Antennae System before the next football season. The expansion requires 104 racks of equipment which necessitates a new building. The plan is to re-use the plans for the existing Telecommunications building to reduce the time spent on design development.
   2. Concrete Bike Pads - Transportation Services requested permission to add concrete pads which will support bike racks located on the north east side of Rudder Tower and the north side of the Military Sciences Building.
   3. Kyle Field Parking Garage - The Athletics Department has requested a new parking garage near Kyle Field for game day parking.
   4. West Campus Residence Hall Parking Garage - The Department of Residence Life has requested a new parking garage on the West Campus near the new West Campus Residence Hall. Committee's recommendation for approval only on design and location - not anything else.

    • TTI Game Day Traffic Study – “Carmaggedon” Alabama game, looking at both pedestrian safety/mobility as well as vehicle management. Some possible solutions: contraflow lanes, more remote parking/shuttles, designated pedestrian lanes.
• Bike Registration – Students understand benefits, don’t want to pay. Currently 5,000 bikes registered. Late night bike count to take place during February. May use impound process to encourage registration; if bike is impounded pay registration fee to get it back.
• Question about low speed vehicles. Group has 6 man electric vehicles and run around campus. Street legal - run on streets and take them around here - get to most parts of BCS at 30 MPH. Special Overview
Dr. José Bermúdez, Associate Provost for Strategic Initiatives, came to give an overview of PricewaterhouseCoopers System Comprehensive Administrative Review. Dr. Bermúdez is chairing the PWC Leadership Committee. The Leadership Committee will review PWC report and make recommendations to President Hussey before the Board of Regents’ fall meeting. Committee is currently meeting weekly. There is no plan for large sweeping change or RIF. Hiring freeze was a strategic move to allow us time to reflect on how we are doing things. An advisory committee made up of faculty, staff and students will also be meeting with Leadership Committee to give feedback. The Leadership Committee also plans to meet other groups for input and guidance.

Overall PWC report was complimentary but there are some factors that are impacting every public university. The first factor is declining state support and the second factor is focus from legislature, etc. on accountability and increased administrative burdens. The goal is to make TAMU smarter and more efficient by coming up with smarter ways to do things, possibly consolidating or sharing some services, and possibly coming up with new innovative ways to do things.

PWC report is just a starting point and the president will decide what we will do. He has the discretion to adopt some or none of it. Will come back at regular intervals to get input and feedback on specific items as
they come up. If idea of shared services in other areas might happen – President Hussey is considering doing small pilot program first to see if these would work.

Will have a website set up soon where information and reports will be available for viewing.
